### Telephone

#### Subscribers Note!

Owing to change in arrangements, the Annual Meeting of the Crossfield Mutual Telephone Co. Ltd., will be held in the Masonic Hall Basement, Saturday, March 20, at 2:30.

#### Local Sweepers Journey North

In an attempt to wrest from the Innisfail Club, the new MacDonald Curling Trophy, two rinks from the local journeyed north last week to try their skill in the "auld roarin' game."

It was an even break which, in this case, was not good enough, so, while Charlie Purvis notched a 17-15 win, Carl Becker lost out in an 11-24 upset.

Those comprising the teams were: C. Purvis, G. Purvis, M. N. Jones, W. J. Wood and C. Becker, D. W. Carmichael, G. Johnson, F. Becker.

### Local Lady Assumes High Office in D. of R.

Congratulations are being extended, at this time, to Mrs. Charles Fox, upon her election to the position of Vice-President of the Rebekah Assembly of Alberta. Mrs. Fox received her appointment last week during the annual session held in Calgary.

Representing Justice Rebekah Lodge No. 62, Crossfield, Mrs. R. E. Genn attended the Convention, while Mr. Charles Fox, in a like capacity, represented Crossfield Lodge L.O.O.F. No. 42.

The Monday evening session was attended by Mrs. Walter Hurt and Mrs. A. E. Edlund, while George McLeod took in the entire Annual Convention, as he has done for the many past years.

Shop where smiles greet you, Crossfield.

### Crossfield Garage Changes Hands

This week a deal has been completed between F. T. Baker and Messrs. W. A. Trelford and J. W. Ballantyne, of Calgary, whereby the latter take over the Crossfield Garage, and Mr. Baker will act as agent for British American Oil Co. Ltd. Orders for gas and oil may still be left at the garage as heretofore.

Mr. Baker has been in the garage business here for the past ten years, and while the break will be felt by many old customers, Fred will still be a member of the Community.

Messrs. Trelford and Ballantyne, new owners, have had wide experience in garage work and tractor repairs, and are prepared to render a high-class, up-to-date service.

The attention of our readers is directed to the advertisement elsewhere on this page.

### REEVE OF MUNICIPALITY NINE CONSECUTIVE YEARS AGAIN ELECTED

### First Monthly Meeting M.D. of Rosebud

The first monthly meeting of the Council of the M.D. of Rosebud No. 280, was held at Carstairs, on Saturday, March 13.

Mr. A. S. Gough was again elected Reeve for the tenth year in succession.

Councillors, A. M. Wygle and G. G. Murdoch, were duly sworn in.

George Ainscough was again nominated and re-elected as Deputy Reeve.

R. D. Sutherland, as Secretary Treasurer, and E. N. Crisfield, as Weed Inspector, were again re-appointed.

By-law to obtain credit for Seed Grain Advances, Under the Relief Advances, Act was passed.

Farmers are asked to co-operate with the Council in destroying all gophers on their property.

No bounty will be paid this year as heretofore.

### ALBERTA MOVES TO MAKE DRIVERS DIM CAR LIGHTS

Important changes in the Vehicles and Highway Traffic Act, which are of interest to all motorists and others using the highways of this province, are provided for in an amending bill introduced in the legislature.

Probably the section of greatest interest is that which makes it compulsory for headlights on motors to be dimmed or dropped. This must be done at a distance of not less than 350 feet.

It is recalled that in recent months strong protests have been expressed at meetings over the menace of glare headlights and the danger of serious accidents.

Another section of the bill requires cycles to be equipped with a lighted headlamp and a lighted tail light or rear reflector when being

### Massey Harris Company Appoints New Agent

To succeed Mr. J. M. Williams as their agent at this point, the Massey Harris Company has chosen Mr. H. McDonald of Pine Lake, as their new representative.

In conversation with the Company's supervisor for this district, we learn that Mr. McDonald has had many, many years of experience in the Implement business, both as to Sales and Service, and the Company is confident that he is fully qualified to serve this district to the best advantages of all concerned.

To Mr. and Mrs. McDonald and family, we extend greetings, and trust that their venture into our district will not only be a happy one, but also profitable, both in business and associations.

### Annual Concert School Fair Association

The School Fair Concert, which should be held about this time of the year, must unfortunately be postponed until such time as the Medical Health Officer lifts the ban on public gatherings for children.

Now that Easter is so near, it must necessarily be left until after the holidays, unless something, now unforeseen happens, we will try and hold it on Friday, April 9.

Teachers, parents and children should keep this date in mind, and practise their pieces whenever possible, for, even, should it be found impossible to hold a concert after all, it will still be good training for the youngsters.

For the benefit of those teachers who are new to our district, we would like to say, that it has been customary for each school in the school-fair, to pick out the best, or most suitable two or three pieces from their Christmas programme, and bring them together in the U.F.A. Hall, thereby making one long programme of about twenty or more items.

We welcome back to the Association, the Beaver Dam school district, and hope that, if and when we hold this concert, they will be with us—Contributed.

### Local News.

Mr. and Mrs. J. T. Davis were Drumheller visitors Sunday.

Miss Wilda Laut is home for the holidays.

Rev. and Mrs. J. H. Pickford visited last week, at Mrs. Pickford's home in Drumheller.

Mr. A. W. E. Carter, of the local bank staff, spent the weekend in Calgary.

Mrs. E. K. Mitchell and son, Robert, returned from Washington last week.

Mrs. L. Overby was a weekend visitor with her daughter, Mrs. G. D. Zang, Calgary.

ridden on a highway at night.

The bill also contains another important section which provides that all motor vehicles shall be equipped with adequate brakes. Standards of adequacy are prescribed while police officers may inspect brakes of any vehicle operating on the highway and may order it to be brought to a brake adequacy forthwith.

Another section makes necessary the reporting to a police officer of all accidents in which a motor vehicle is involved, if any injury to person or property is caused by the accident.

The amending bill is in line with representations which have been made to the provincial government from time to time by the Alberta Motor Association in the interests of greater road safety.

## Crossfield Co-operative U.F.A. STORE

### Boots and Shoes

**Grebbs Work Boots, \$3.75 to \$4.75**

**Durabilt, " " 2.85 to 3.75**

**Gopher Poison per tin . . . 45c**

**Ceresan, 1 lb. \$1.00, 5 lbs. \$3.90**

"Where QUALITY and PRICES Meet"

### Board of Trade Annual Meeting

Announcements and calls have been issued for the Annual Meeting of the Board of Trade, and it is hoped that a large turn-out of members will be on hand for this very special occasion. The usual election of officers will take place, and only by a large representative gathering, can the wish of the Board, as a whole, be determined.

Mr. E. C. Collier L.L.B., well known to many in this district, will be the speaker of the evening, and is taking as his topic, "Appraisal and Analysis of Recent Debt Legislation." Let us, as members, show our appreciation by turning out in full force. When speakers like Mr. Collier signify their willingness to come to Crossfield and address a meeting of the Board, it is decidedly lacking in courtesy, to greet such a person by other than a large turn-out. Let us then send away our speakers with good impressions of the Crossfield Board, which can only be done by large and enthusiastic meetings.

### Change of Date for Community Sale

A change of date has been necessary, and the seventh annual Community Sale will be held at Crossfield, Saturday, March 27.

Get your listings in now so as the bills can be made up.

See T. Tredaway.

### Crossfield Dramatic Society Preparing For Big Doings

As has been announced in these columns, the Social Committee of the C.D.S. is staging a Kiddie Kapers party on April 1st, at the Masonic Hall. This will take the form of an International Kiddie Get-Together. All members and their guests must be in Juvenile Costume of the country which they have chosen to represent. Prizes will be awarded to the best costumes. A High-light of the programme will be a "Baby Show". Members are again reminded of the fact that they are at liberty to bring one guest each. Watch these columns for further details.—Contributed

## Announcement

Having rented my Garage to Messrs. W. A. Trelford and J. W. Ballantyne, I wish to take this opportunity of Thanking my many patrons for the business extended to me during the past ten years.

It is my intention to devote my whole efforts to the British American Oil Agency, and orders for this Company's products will still be taken at the old stand, phone 4.

On behalf of Messrs Trelford and Ballantyne, I respectfully solicit the continuous patronage of my old customers and assure them they will receive the same courteous treatment at all times.

### CROSSFIELD GARAGE

F. T. BAKER

Having taken over the Crossfield Garage, we desire, at this time, to extend greetings to the many customers and patrons.

At all times, it will be our endeavour to serve you to the best of our ability, and we ask for a continuance of your very valuable patronage.

Auto Repairs, Tires, Tubes, Storage, everything required for a "High-Class Garage Service" will be kept. Tractor Repairing and Overhauling, Our Specialty.

### Crossfield Garage

## NEW DETAILS ARE GIVEN OF BRITISH NAVAL PLANS

London.—New details of British naval construction and strategy, a new picture of the thoroughness with which the government is carrying out its rearmament program, were unfolded in the House of Commons by Sir Samuel Hoare.

Introducing the 1937 naval estimates, the first lord of the admiralty revealed that by the end of the year Britain would have under construction the "remarkable number" of 148 new ships, that anti-aircraft weapons were being produced "on a scale of precision undreamt of in 1918," that plans would be ready to repel any attack on British shipping in "near row seas," and that the Singapore naval base was nearing completion.

After the speech, Mr. A. V. Alexander, former Lord first lord of the admiralty, stated that the Dominions had been consulted concerning the general rearmament program.

He further asked if they were prepared to contribute something to the enormous burden to taxpayers involved in the government's program. "If there is danger of war in the Pacific," he said, "the Dominions might find themselves in a different frame of mind from what they have been in recently."

Lord Stanley, parliamentary secretary for the admiralty, said the Dominions were being kept in the closest touch through their representatives at meetings of the committee for imperial defence.

Alexander called the government's rearmament policy "unilateral" and warned that "along that road lies the approach to national madness, national suicide, instead of any real preservation of the empire."

Sir Samuel sought once and for all to still claims that naval power was being outmoded by aircraft. Today, he declared, every sensible student of defence problems realized the interdependence of sea and air power. The danger of air attack would be met by the fullest use of air power itself and the production of anti-aircraft weapons which were having the effect of making the warship the least attractive target for an enemy air force to attack.

"I do not say that because it is the most unattractive target in the world that this target will never be attacked," Sir Samuel continued. "Nor do I say that if the ships are attacked that they will not be sunk. We never claimed to make battleships unsinkable. It will again be possible to sink even battleships with gunfire, mines or torpedoes. No doubt in certain conditions it is also possible to sink ships by air attack."

"We are forced," said Sir Samuel, "to telescope into two or three years what ought to, normally, be carried out in a decade."

For the new battleships there had been no less than 18 designs before the final design was accepted. Full scale and small scale experiments of the most secret kind had been carried out with every type of explosive under every kind of strength and construction of material.

"There is not a ship in this program which will not bear evidence of this concentration upon the problems of the new world," Sir Samuel declared.

"But the fact remains that of all the targets that the enemy may select, the fleet, protected by its own aircraft and aided possibly in certain conditions by shore-based aircraft, heavily armored by the latest developments of metallurgical science, staff with anti-aircraft guns of amazing volume and increasing precision, will undoubtedly be the least attractive target an enemy is likely to select."

**May Attend Coronation**

New York.—Hon. Vincent Massey, Canadian high commissioner in London, notified the Hart House string quartet that their leader, James Levey, has been officially invited to represent them in the orchestra at the coronation ceremony in Westminster Abbey, May 12. The coronation orchestra will be composed of leading musicians of the United Kingdom.

**Chemistry Professor To Retire**

Toronto.—Dr. W. Lash Miller, professor of physical chemistry at the University of Toronto, announced his retirement at the end of the present term. On the staff for 47 years, Dr. Miller in 1928 lectured on the elements of toxic substances which causes growth in plants.

Changing London's street car systems to trolley bus cost \$50,000,000.

## Misleading Publicity

**Urges Steps Be Taken To Stop Dishonest Brokerage Practices**

Ottawa.—Dishonest brokerage practices must be stopped in Canada in the promotion of the Dominion's mining and other resources, Senator Arthur Sauve (Cons., Rigaud), declared in the senate.

"It is a very dishonest exploitation of the public and waste war against all such abuses," he urged. In order to obtain a rational development of the country's natural resources, "we must base the confidence of our people on the solid rock of scientific truth and seek technical men who are prepared to place their knowledge at the disposal of the state."

He said all governments should exercise "a close supervision of all activities tending or pretending to develop our natural resources."

Senator Sauve was speaking on his resolution for an extended Canadian mining policy, the taking of steps against dishonest brokerage and fallacious prospectuses and misleading publicity.

## Surplus Is Expected

**Amount Estimated By B.C. Finance Minister Is \$2,000,000**

Vancouver.—Hon. John Hart, British Columbia finance minister, estimated in an interview here the province would have a surplus of \$2,000,000 at the close of the present fiscal year, March 31.

Mr. Hart, returned from eastern Canada where he spent several weeks with Premier T. D. Pattullo on provincial business, said the surplus would be used for direct unemployment relief expenditures for which it had previously been necessary to borrow.

The minister said the \$3,000,000 loan negotiated by the premier and himself recently in Toronto, was 100 per cent successful. He said the loan would be used almost entirely for road construction.

## Ships In Grain Race

**Fourteen Taking New Wheat From Australia To Europe**

London.—Fourteen great windjammers beat their way along the Cape Horn route in the annual race from Australian ports to bring the new wheat crop to Great Britain and the European continent.

Most of the world's well-known large sailing vessels are engaged in the race. Usually the voyage takes from 90 to 120 days.

One ship, the Abraham Rydberg, started as early as January 12 from Wallaroo. The C. B. Pedersen—fitted like a toy ship in a Swedish-owned steel, four-masted bark—put out from Port Gernard January 23. Twelve other craft started at various times up to March 3.

## Looking For Recruits

**Britain Investigates Possibility Of Securing Volunteers From Dominions**

London.—Investigation is proceeding to ascertain whether it is possible to obtain recruits for the British army from the dominions and colonies. It was shown in the annual report on recruiting for the army for the year ended Sept. 30, 1936.

The report showed recruiting was still falling off despite doubled efforts to bring in new men. Recruits for the year were 21,975 against 25,681 in 1934-35. Some 32,000 men are required annually to bring the army up to full strength, the report said. Thus the deficit for the year under review was more than 10,000.

## Idea Voted Down

**Compulsory Registration And Voting Not Feasible For Canada**

Ottawa.—Compulsory voting and compulsory registration were unanimously voted down by the Commons special committee on the Elections and Franchise Act.

Vote was taken without discussion additional to that at the committee's previous session, when Australia's experience with the compulsory exercise of the franchise was studied.

It was felt that the compulsory system was inapplicable in the Canadian climate, that the increased cost entailed would not be justified by the comparatively small increase in votes polled in countries where it is now in operation.

**Rare Materials For War Debts**

Washington.—President Roosevelt's national resources board has recommended the United States accept certain raw materials of war in partial payment of the \$12,000,000,000 debt piled up by the Great War.

## Epidemic In North

**Measles Taking Heavy Toll Among Indians In Saskatchewan**

Prince Albert.—An epidemic of measles is taking heavy toll among Indians in the vicinity of Ile a la Crosse and Beauval, it was reported by Walter Gilbert, Canadian Airways superintendent, on return from a flight north.

There were eight deaths in three days at Ile a la Crosse, he said, and about 90 of the 100 in the Beauval mission are ill. Apparently only Indians are affected, and pneumonia contracted following an attack of measles is the immediate cause of death, according to reports.

## Should Stay At Home

**Says No Country In Position To Absorb Immigrants**

Geneva.—Would-be emigrants might better stay at home under present world economic conditions, Alfred Rives, Canadian delegate, declared before the League of Nations raw materials committee.

Rives ascribed the sharp drop in emigration to effect rather than cause, in relation to economic problems. No country is in a position to absorb new blood when it has a major unemployment problem of its own, he said.

## COMMONS IS TOLD TRADE PACT MAY BE CAUSE OF WAR

Ottawa.—From two of its independent minds the House of Commons heard an attack on the United Kingdom trade agreement and a proposal for an immediate attempt to solve Canada's railway problem.

William H. Moore, Liberal member for Ontario, who jumped over party traces and voted with the opposition against the budget, and Hon. H. H. Stevens, member for Kootenay East, who two years ago resigned from a Conservative government to found and lead the Reconstruction party, were the star performers in the budget debate.

Mr. Moore said he had voted against the Empire trade agreements in 1932 and saw no reason to change his view now that a renewal of the pact with Great Britain was before the house. He believed economic imperialism as represented in the agreements might lead to war and had been a contributing factor to developments in Japan, Germany and Italy.

"We play the game of politics but don't play the game of the people," said Mr. Stevens as he charged the house was neglecting real grievances and doing nothing to settle the country's problems.

On the railway problem Mr. Stevens proposed appointment of three joint committees of the senate and house of commons, one to consider co-ordination of railways, one of the rights of labor and the third elimination of politics. Next he would have a special session of parliament in the autumn to receive reports of the committees and deal with the problems and fearlessly with the problem.

## QUEEN POSES WITH FAMOUS DOLL DESIGNER

Her Majesty the Queen met Miss Marjorie Davies, famous doll designer, when she was making a tour of the British Industries Fair, so they had their photograph taken together. Miss Davies is holding one of her creations.

## CAUSES NAZI FLURRY

Mayor Florentino La Guardia of New York, whose ironic suggestions regarding the Nazi Government and Hitler himself, caused German newspapers to burst into angry protest.

## Sees Economic Crash

**Steel Magnate Fears Trouble Will Overtake Britain Within Two Years**

Ottawa.—Lord Riverdale, British industrialist, told interviewers that within two years there would be danger of an economic crash in the United Kingdom.

The steel magnate, formerly Sir Arthur Balfour, said "times are too good" in England, prices are rising too high and the great re-armament program "has come on the top of legitimate business" instead of being undertaken a few years ago "when it would have done some good."

Nevertheless, he added, the armament program would help sustain the boom for the next two years. After that reaction was inevitable in his view.

## Image Stolen

**1500-Year-Old Miniature Taken From Japanese Temple**

Mara, Japan.—Police were mobilized for a nation-wide search for a 1,500-year-old miniature image missing from the celebrated Todaiji temple.

The eight-inch image, of silver encrusted with gems, apparently was stolen by thieves. It surmounted a larger figure of Buddha, considered the oldest and most precious in Japan.

The miniature image was set in the gold crown of the Buddha, embellished with 20,000 jewels and valued by temple authorities at 50,000,000 yen (\$14,250,000).

**France Sells Prison Ship**

Paris.—France has discarded her famous floating jail—the prison ship La Martinique which has carried more than 10,000 convicts to Devil's Island since 1921. The ship was turned over to a commercial shipping concern. No more convicts will be sent to the prison settlement, the government has decreed.

**Raid Gambling Places**

Montreal.—Just to ensure there would be no "tip-off," police used moving vans in raids on three gambling places here. Officers piled out of the vans and arrested 119 Chinese who appeared in court.

## Takes Precautions

**Wife Of U.S. Ambassador To Soviet Ships Supplies To Russia**

New York.—Enough cream to last through two Moscow winters has been purchased by Mrs. Marjorie Post Hutton Davies, wife of Joseph E. Davies, new United States ambassador to the Soviet.

The cream shipment, comprising 2,000 pints in cardboard containers and frozen by a special process, will precede the Davies to their official residence, where 25 electric refrigerators are being installed. After the cream is stored there will still be room in the refrigeration plant for the preservation of out-of-season strawberries.

In addition to strawberries and cream, Mrs. Davies has purchased a large quantity of rock salt for making ice cream.

Mrs. Davies' precautions regarding an adequate cream supply were regarded with amusement at the Soviet consulate. Contrary to popular belief, there are cows in Russia, one of the secretaries said.

## Subsidy To Municipalities

**Ontario Government To Implement Promises In Budget Speech**

Toronto.—The Ontario government moved to implement Premier Mitchell Hepburn's budget speech promise of a subsidy to municipalities equivalent to one mill on their tax rates.

Hon. David Croft, minister of municipal affairs, introduced the municipal subsidy bill. It was revealed power to direct municipalities as to how the subsidies shall be passed on to the individual taxpayer will be reserved to the cabinet.

The preamble made it clear the subsidy must not be regarded as a permanent measure. It said the government anticipated a survey soon to be made of provincial and municipal taxation fields, would make possible relief of real estate from some taxation, but in the meantime the government wanted to aid this end.

Mr. Croft also brought in measures to enable the government to pay municipal shares of old age pensions and mothers' allowances.

## LABOR CONGRESS OPPOSED TO PLAN OF IMMIGRATION

Toronto.—A labor delegate assailed purported efforts of "well-known Canadian" leaders, immigration as the All-Canadian Congress of Labor went on record as being opposed to loosening of immigration restrictions.

The congress also passed a resolution unanimously urging provincial governments to extend minimum wage laws as rapidly as possible. It went on record, too, as urging the federal government to prevent profiteering in all forms and take over and operate armament industries in the event of Canada being involved in another war.

The Labor congress, meeting in seventh annual session, decided to ask the federal government not "to raise the sluice gates of restriction" until such action involving immigration was warranted by economic conditions in Canada.

Passage of the immigration resolution followed an attack by George Cockburn of Regina, who referred to Sir Edward Beatty, Canadian Pacific Railways president, as one of the "well-known Canadians."

Workers of Canada were warned to be on guard against the rise of fascism in the Dominion in another resolution passed.

The congress laid over a resolution calling for appointment of a royal commission "to consider, in consultation with the provinces, amendment to the British North America Act with respect to jurisdiction of federal and provincial governments in the matter of social legislation."

## Motor License Trouble

**B.C. Government Will Remove Undue Irritation To Bone-fide Tourists**

Victoria.—The British Columbia government will see that undue irritation to bone-fide motorists entering British Columbia from Alberta is removed, but will insist that motorists intending to settle in the coast province buy B.C. license plates for their cars.

Attorney-General Gordon Sloan made the statement after citing three recent cases in which prairie motorists complained they were stopped at the border by British Columbia police and compelled to buy B.C. license plates. None of the three came under the bone-fide tourist class the attorney-general said.

## OPPOSE GRANTING OF FRANCHISE TO B.C. ORIENTALS

Ottawa.—Granting of the franchise to Orientals in British Columbia might advance their economic assimilation but could not break down their racial characteristics, Thomas Reid (Lib., New Westminster) declared before the commons committee on the election and franchise acts.

"Are we in Canada prepared to allow an unassimilable race of people to control the economic and political life, if not of Canada, then that of British Columbia, the dangers of which have become more apparent in that province during the past number of years?" he asked.

The racial disqualification in British Columbia was essentially a provincial matter, he contended, since the people of British Columbia were the ones directly affected. They had declined not to permit Orientals to vote in provincial elections, but representations had been made to Ottawa by a Japanese delegation last year whose brief he was replying to, he said.

Mr. Reid took strong exception to a suggestion Canada was less generous in its treatment of Orientals within its border than Japan itself was to those of alien birth there. In addition to being barred from many specific private rights, such as owning shares in certain large corporations or owning mining rights or Japanese ships, aliens in Japan were excluded from suffrage and could not even join political parties or promote public political meetings, he said.

"If the other provinces had the same proportions of Orientals as British Columbia has, not only would this problem have been brought home to them, but something would have been done about it ere this time."

## Keep Schools Open

**Manitoba To Provide Assistance To Districts Lacking Funds**

Winnipeg.—All Manitoba schools will be kept open 10 months of the year, where climatic conditions permit, regardless of the financial position of local school districts, Hon. Ivan Schultz, minister of education, stated in the legislature.

The government will provide special assistance to "any district lacking sufficient funds, he said.

The house was considering estimates of expenditures and H. F. Lawrence (C.P., St. Boniface), said Hon. John Bracken's salary of \$6,100 was not sufficient for the premier of Manitoba. Mr. Lawrence said the premier's salary should not be less than \$10,000.

The premier should be paid "a decent salary to keep him honest," Mr. Lawrence said, adding that the other cabinet ministers were not adequately paid.

## C.W.N.A. Meeting

**Annual Gathering Of Weekly Newspaper Association To Be Held At Halifax**

Ottawa.—The board of directors of the Canadian Weekly Newspaper Association at their semi-annual meeting here decided to hold this year's annual convention in Halifax the second or third week in August.

A special committee of the board had a conference with Finance Minister C. A. Dunning, Agriculture Minister J. G. Gardiner and Secretary of State Fernand Rinfret. Advertising, printing and general publicity matters were under discussion.

S. J. Dorman of Alameda, Sask., acted as spokesman for the committee, which included President L. J. Bennett, Carman, Man.; Cameron Macintosh, member of parliament for North Battleford, Sask.; S. N. Wynn, Yorkton, Sask.; and W. A. Bourn, Hartney, Man.

**Originator Of Sit-Down Strike**

London, Ont.—Origin of "sit-down" strikes can be traced to Gandhi's non-resistance tactics of a decade ago, in the opinion of Thomas Rogers, former member of the staff of the Bombay Statesman, largest English language newspaper in India, now a London resident.

**Messages For King George**

Ottawa.—Dr. O. D. Skelton, under secretary of state for external affairs, has written Mayor Stanley Lewis that municipalities desiring to present addresses to King George may send them to the governor-general for transmission.

**TODAY'S THOUGHT**

— \* —

**STEADY FRIENDSHIP**

To be capable of steady friendship and lasting love are the two greatest proofs, not only of goodness of heart, but, of strength of mind — Hazlitt.

**HOW DO YOU SAIL —**

**A** MAN may make his way across the Atlantic Ocean in a skiff, for all we know; but, if you are intending to cross the sea, take this advice, secure passage in a first-class steamer, and you will be more likely to get there.

So it is to-day, on the sea of Life; most of us are floundering around in our little skiffs, all eager to reach the land of Prosperity, to beat our fellowmen to the Port of Disembarkation, and grab for ourselves the choicest of the choice, instead of booking passage on the ship of 'Commonsense.'

What is the result; many upsets are encountered, rescues have to be effected; but still we ignore the warnings and persist in this mode of travel, heeding not the coming squalls.

To-day, our ship of State is idly whirling round and round, because it cannot go forward, owing to discord aboard, mutiny is rife, officers in disagreement. Where, then, are we drifting? To the shoals and rocks of disillusionment and despair? Unfortunately, that will be the result, unless we all get aboard with one object in view, that of pulling together, everyone working his way, all free-passage lists suspended.

Over the side must go, for the present, all new, untried, fangled cargoes, a clear course set, determined and kept, sticking to the routes of common sense, the old ship on even keel.

Above all, harmony must exist, charts must be studied, soundings taken and their warnings heeded; otherwise Shipwreck will result on the Reefs of Individualism and Classicism.

Let the past bury its past, the future take care of itself, today is what counts, its problems solved, NOW, NOW, no use dreaming of the Golden Land we are heading for tomorrow, if we cannot get under way today. Clear the decks of foolishness and false ideas, get down to bedrock, overboard with the cargo of disillusionment, and start afresh, everyone working for the common good, irrespective of Colour, Creed, or Politics.

As individuals, of a State, if we are to keep on an even keel, and save ourselves from being lost in the fogs that beset us, then must we clear our decks for concentrated, clear and sane thinking; not tomorrow or the next day, but, Now, right now. The sooner we realize it and get together in one large united effort, then, the sooner will we reach that Goal for which we all yearn, Peace and Contentment, and the right to live simple, happy lives.

\*\*\*\*\*

P. D. Says: The height of something or other is a dumb girl turning a deaf ear to a blind date.

**Our Farm News Letter**

Contributed by  
B. Leslie Emslie, C.D.A. (Glas.) F.C.S.

**Banished from Iona**

Three years ago, B. Leslie Emslie realized his ambition to visit the Sacred Isle of Iona, one of the Inner Hebrides, lying off the coast of Mull, Argyllshire, Scotland. To this island, from Ireland, in the year 563, came Saint Columba, and twelve disciples to establish Christianity in Scotland. St. Columba, said the guide, was a misogynist and banished women and cows from Iona, rehabilitating them on a small adjacent island, known now as Eilean nam Ban (island of Women). The saint seems to have reasoned that where there was a cow there was a dairymaid; a dairymaid was woman, and a woman was a potential source of trouble. This was the theory advanced by the guide; but in all likelihood, St. Columba knew enough about farming to realize that the grazing on the barren, though sacred, soil of Iona was incapable of producing milk of the quality and volume desired.

**The World of Wheat.**  
By H. G. L. Strange  
Director "Crop Testing Plan."

Wanted — "A Perfect Wheat!"  
At all events, a wheat earlier than Red Fife.

Dr. Seager Wheeler in his excellent book "Profitable Grain Growing", tells us that in 1910 he applied himself to the search for just such a new variety.

In a field of Australian "White Bobs" Dr. Seager Wheeler found a head that had red kernels. He multiplied this and one of his selections from it is the famous Red Bobs 222 (sometimes called Early Triumph) — an important early wheat about six days earlier than Marquis, with good milling and baking qualities, very strong in the straw, and yielding quite as high as Marquis.

Its defects are that in a dry fall it shatters rather easily, and in a wet fall and on certain types of soil, it sometimes throws starchy and piebald kernels.

Being susceptible to black stem rust, however, it is not recommended for the rust areas of Manitoba or Eastern Saskatchewan, but it is now being increasingly used in parts of Alberta and Western Saskatchewan.

Dr. Seager Wheeler, by his skill and thoroughness in producing Red Bobs, and fine strain of Marquis 10 B, has added many millions of dollars of extra wealth to the pockets of Western Canadian farmers.

**ACCIDENT LEADS TO MAJOR INDUSTRY**

A cow kicking over a lamp, they say, started the Chicago fire. A spider climbing a thread brought Erase of Scotland victory. But these and many other like historical incidents pale before the story of the housewife whose carelessness founded one of the most important phases of the Canadian fish industry.

Away back in a Scottish village a housewife left a haddock hanging from the rafters of her cottage as she went out for the day. She had left it too near the peat fire, however, and when she returned, the fish was all dried by the smoke from the fire. She decided to cook it anyway and the result was so appetizing that the news spread like wildfire and smoked fish became a national delicacy.

Today the popularity of smoked fish has spread everywhere and the appetite for this delicacy has founded Canadian organizations of international repute, some of which have been established for a century and more.

The Canadian climate has been found ideal for the production of this delicacy and other cured fish and today the Dominion holds a foremost place in world trade in the export of dried, smoked, and pickled fish.

**WRESTLING BOUT STAGED AT CARSTAIRS EAST COMMUNITY HALL**

For the first time in the community, Wrestling Fans will be given an opportunity of seeing the Masked Marvel of Portland, mix it with Scotty McDonald of Salt Lake, when they meet on Monday, March 22, at Carstairs East Community Hall.

In the semi-final, Jack Page of Innisfail will come to grips with Ed Briand of Calgary, and they will be preceded by a snappy preliminary.

Show starts at 8 p.m. Admission is sixty cents. See ad in other columns for full particulars.

## First Trans-Atlantic Air Terminal In America Built In Newfoundland

America's first trans-Atlantic air terminal, one of the largest of the dromes in the world, is rising out of the virgin wilderness of Newfoundland not far from the spot where the first flight across the Atlantic was started eighteen years ago.

Nine miles from St. John's, and 40 miles north-northwest of St. John's, at a site known as Hattie's Camp, British Empire groups are constructing their first air base on this side of the ocean as a way station of arrival and departure for giant airliners which are soon to be winging across the stormy North Atlantic to link Canada, Ireland and Britain.

Because of the inaccessibility of the location, little news has leaked out concerning the real progress made. To-day, however, there is a new station along the Newfoundland Railway, labeled, "Newfoundland Airport." Trains of flat cars have been pushing back and forth between the airport site and the coastal ports for several months on one of the biggest construction projects ever undertaken in this colony. The trains have been transporting men and machinery to the new site.

Since early last spring, an army of 350 men, well equipped with machinery, trucks, tractors, stump pullers, steam shovels, scrapers, sledges, compressors and other equipment, has carved a square mile of ground out of the heavily forested countryside, laying foundations for the four great runways that will mark the field. A short distance away, on Gander Lake, the first clearing has been made for the installation of a great seaplane or flying-boat base to be operated in conjunction with the land airfield for trans-Atlantic flying.

Following a series of preliminary surveys made by engineers of Imperial Airways, the British Air Ministry and colonial officials, this airport site was decided upon because of the uniformly clear approaches available from all directions. Actual clearing work was begun in May last year, on a program which anticipates the expenditure of more than \$500,000 already allotted for the work.

The Newfoundland Airport, it was pointed out, is to be the main American operating base for the trans-Atlantic service of Imperial Airways. At the Newfoundland base will be the large storeroom and work hangars, the shop facilities and a hotel for passengers who may stop here overnight awaiting transfer to trans-Atlantic airliners or connections to Canada or the United States.

At the present time, about 300 men are being quartered on the field in temporary structures which are to give way, as the work progresses, to large modern administration offices, customs and public health stations, and other buildings. On the main field, the four runways already have been marked off. Three of these are 4,500 feet long and 600 feet wide each, intersecting each other at an angle of 45 degrees. The fourth and master runway will be about 5,000 feet long and 1,200 feet in width.

These runways are now being graded and each will have a complete drainage system of its own. They are to be surfaced with asphalt for their entire length and will, in addition, have an added surface extending beyond the asphalt limits at either end.

The woodmen are extending clearings from the end of these runways, for about a mile to provide clear approaches from all directions. A series of lights, embedded flush with the runways' surface, will be installed for night operation to supplement the standard flood lighting and boundary markings. As an indication of the size of the aircraft expected in the future, these runways will be capable of handling craft weighing up to 200,000 pounds.

While no official word has been given out concerning the project, it is understood that orders are to rush two of the runways to completion for use this coming spring, when it is said the first experimental flights over the new ocean airway will be made.

**Airplane Ski Found.**  
A 10-foot airplane ski, bearing a nameplate "FC-229.I.A.", was found on a beach at Savary Island, B.C. Savary Island is 75 miles north of Vancouver. Landing gear attachment was missing but the ski was otherwise undamaged. Apparently it had been in the water for some time.

### Rust Resistant Wheat

New Thatcher Strain Appears To Have Hardy Qualities

In the hybridizing of wheat that has resulted in the rust resistant Thatcher, perhaps the cerealists have given to the world something better than is generally known, if the experience of one woman at Binnett, Saskatchewan, proves to be a characteristic of the grain.

May 16, 1936, a lady who had received a small parcel of sample Thatcher wheat, planted the kernels in her garden plot. It grew and thrived well. When about three inches above the ground, a horse rolled on it, and pressed every blade firmly into the ground. It looked as if an elephant had slept on it.

A few days later the wheat was up and doing, and by the first of July it looked like a bumper crop. It did not look quite so good July 2, for a patriotic cow celebrated Dominion Day in the garden and pruned the wheat stems down to within four inches of the ground.

But even that experience did not hinder the Thatcher wheat from growing up strong and healthy again. It ripened by Aug. 10. The lady did not harvest it just then, and a day or two later, a band of turkeys had a splendid feed off the golden grain, taking better than two-thirds of the ripe kernels. Then the lady decided it was time to salvage what she could, and this year she will have close to 5,000 kernels for seed.

The lady plans to protect this year's crop, and to really give this grain a chance to show what it can do, under ordinary conditions. Regina Leader-Post.

### Just Another Man

Time-Keeper At Mine Did Not Recognize Governor-General's Name

The time office at the Frood Mine in Sudbury has accidentally been let in on a deep secret. It has discovered that Lord Tweedsmuir is the Governor-General of Canada.

It was during His Excellency's visit that a reporter called the big mine and found out he had gone down the shaft.

"Is Lord Tweedsmuir going underground to-day?" asked the scribe. "What level does he work on?" inquired the voice at the other end. Slowly and distinctly the reporter repeated the name:

"Lord Tweedsmuir . . . he was to have gone underground to-day. . . do you know whether he made the trip?"

"Say listen," came the exasperated reply. "We have 3,000 men working for us, see. Do you think we know them all by name?"

"We merely wanted to know if the Governor-General of Canada was going to visit the mine to-day," said the reporter.

"Oh, him? Why didn't you say so?" came the voice from the time office. "He's down underground right now."

### New Idea For Holidays

Doctor Thinks Many People Should Spend Them In Bed

Dr. Alfred Cox, general secretary of the British Health Resorts Association, does not agree with the present distribution of holidays. Speaking at the Institute of Hygiene on "Holidays in Winter," he said that the man who had to do necessary, dangerous, or disagreeable work ought logically to have the longest spell of holidays. The idle rich, who had done nothing to earn a holiday, ought either to be compelled to go on "killing time," or, perhaps, better still, be given a job of really hard work.

Dr. Cox advocated a holiday in bed. There were a good many thousands of people who never got sufficient sleep, he said.

### Not Very Welcome

Wife (breaking the news of good-for-nothing brother's arrival): "Hector has come to stay for a few days, poor boy. He's looking very seedy."

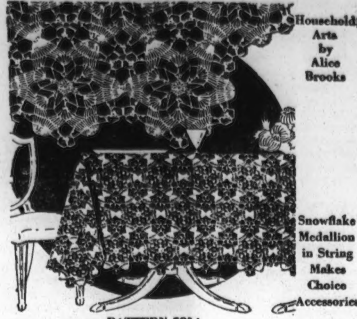

Husband—"Seedy, is he? Well, he isn't going to plant himself here."

Humps on the back of a camel are masses of fat, not water reservoirs, as is commonly believed.

Q—What is an osteopath?  
A—A chap who works his fingers to the bone.

Adult male eagles are smaller than the females.

## Beauty Joins Economy in Crochet

PATTERN 5814

Dinner's planned! Everybody's coming! And this is the very cloth to set off all the delicious things you're having. The elusive snowflake inspired this lacy pattern, one that's done in string a medallion at a time. When you've learned the 8 1/4 inch key design you've learned them all, and the "repeats" go fast. Just join them together if you own this cloth, a handsome bedspread, or matching scarf for your dresser. In pattern 5814 you will find complete instructions for making the medallion shown; an illustration of it and of all the stitches used; material requirements. To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

### Study Newspaper Practices

Unwarranted Intrusion Into Private Family Affairs To Be Reviewed

"Unwarranted intrusion by newspaper into private family affairs and other unprofessional practices in the collection of news" will be studied by a conference sponsored by the Institute of Journalists, the National Union of Journalists, the Newspaper Proprietors' Association, the Newspaper Society and various other organizations in the news field in Britain.

"The idea of such a conference," commented the World's Press News, "met a mixed reception in Fleet street. Though many believe that pooling the views of journalists and proprietors would be of considerable assistance in dealing with future occurrences, other state that following many resolutions passed by proprietorial bodies and news agencies there is little more to be said."

"Nearly all agree, however, that it is virtually impossible to lay down any hard and fast rules in such a matter. Circumstances vary in most so-called human interest stories, and treatment largely depends on the individual discretions of the editor or news editor."

A recent questionnaire showed British editors in general opposed to "needless intrusion on private grief," but in many cases lack of police and other official information was blamed as making the alleged intrusions necessary.

### Effectively Censored

Sinclair Lewis Tells Amusing Story About One Of His Books

Sinclair Lewis, the American novelist, one of whose novels has recently been banned in Germany—and who was 32 the other day—tells an amusing story of another form of censorship. Recently when on voyage to England, he was strolling along the deck one morning when he saw an elderly lady reading one of his novels, recounts the News of the World. "This is fame!" he said to himself. "Here am I, Sinclair Lewis, and there is an unknown but obviously cured woman absorbed in one of my books." Next instant he saw the reader close the book with a furious gesture, and throw it into the ocean!

Mont Blanc, highest peak of the Alps, commonly supposed to be in Switzerland, is really almost entirely in French territory.

Being color blind, cats live in a world of somber grayness.

### ARAB NATIONALISM RAMPANT FROM INDIA TO THE ATLANTIC

Although very little is appearing in the press about Pan-Arabism, as it is called, there is, nevertheless, an amazing cycle of Moslem nationalism sweeping through near East. Last year saw both Egypt and Syria gain their independence and now these two nations are clamoring for the rights of the Palestinian brethren, and several non-aggression treaties have been signed between the Moslem countries of Turkey, Iran, Saudi Arabia and Afghanistan. The future movements of these countries is being carefully watched by European statesmen. The picture above is typical of Arabs in Algeria as they gather in the market places.

## Agriculturist In Britain Tells Poultry Farmers How To Get Right Shades of Eggs

### Old Time Table Etiquette

Manners Have Changed But Eating Implements Much The Same

Digging into the history of eating, scientists came up with the assertion that civilization's first fork users were called sissies.

"Italians," explained the National Geographic Society, "were the first to use forks for eating, and were ridiculed as over-fastidious or even effeminate."

The table manners research was launched after a joint expedition of National Geographic Society and Smithsonian Institution scientists uncovered some 1,000-year-old spoons in Alaska.

"These ancient utensils," the scientists reported, "give a vivid picture of the life 10 centuries ago, but they are also reminders that although table manners have changed, eating implements of to-day are essentially the same as in prehistoric times."

They hastened to add that the Eskimo still clings to the age-old use of his knife. This consists of stuffing his mouth with meat and then whacking off the remainder with a swift stroke that barely muddies his nose.

Wielders of the fork, which was introduced in the late 16th century, didn't batter down the barriers of convention until the 17th century. Up to that time the best table etiquette called for the time-honored method of picking up food with the thumb and the first two fingers.

"Use of mere fingers," explained the scientists, "was considered bad table manners."

### Going Into Law Business

Courageous Youth Finds Blindness No Handicap To Success

University of Michigan law school has issued a diploma to a blind student—second such occurrence in the college's history.

The student is Mandino Perlongo, 28-year-old Italian who lost his sight in an accident when he was four years old. As an example being blind is no handicap to success he points to his friend common pleader Judge Ned Smith, of Detroit, only other blind person to receive a law degree from University of Michigan.

"I hope and expect to make a go of the law business," he said.

Perlongo entered law school in 1934. He took notes from lectures in braille and did his case work by having the letters read to him. He briefed the cases and typed his examinations.

He was an honor student on graduation from Michigan State College in 1931. He is an accomplished pianist and played in an orchestra for several years. He is also an expert craftsman.

### No War Is Inevitable

If Nations Believed This All Conflict Would Be Averted

Joseph Toole, Lord Mayor of Manchester, says there never was an inevitable war. There have been over three thousand, and they have never settled anything. They have only sown the seeds of future wars.

It is high time somebody said for the plain folk of Europe that war is not inevitable between us, that it must not take place, and that those who through blundering statesmanship make it, must fight it themselves.

Russia is producing tartaric acid from grapevines.

This is a more color-conscious century than the one which preceded it; the existence of the British Color Council, over whose dinner Lord Derby was presiding recently, is one proof of that point, and a few days ago it was complained from the United States Bureau of Standards that there are "100,000,000 distinguishable colors for which there are approximately only 500 color names."

Everyone is interested in colors, even the poultry-farmer, for whose benefit the Ministry of Agriculture has just issued a bulletin which yields among other things, the latest information on how to get the right shades attached to the hen's egg. The customer's supposed preference for brown eggs over white is an old story, but the shading recently, is one that can be easily altered without any assistance from the hen.

The Ministry's bulletin is concerned with the subtler matter of the yolk's complexion, which at first sight would seem an affair for the hen alone. Research has now shown, however, that the richly yellow yolk (which housewives are said to demand in preference to any paler color scheme) can be produced by appropriate foodstuffs for the poultry; clover will yield a medium orange-red yolk, cabbage a bright orange-red, and beetroot a darker shade still.

It only remains to introduce the correct diet and it would seem that, though omelets cannot be made without breaking eggs, the ultimate color of the yolk could be marked with certainty on the still unshattered shell. A little more research and a few more rearrangements of diet and further triumphs could doubtless be achieved.

Scotch has produced for the British Industries Fair a Coronation piano with red, white and blue keys. Why not a Coronation egg with a yolk like the Union Jack?—Manchester Guardian.

### Our Neighbor

Planet With A Density 50,000 Times Greater Than Water

How little we really know about the people next door! The great brightness of Sirius, as the Dog Star is familiarly called, is largely due to the fact that he is one of our nearest stellar neighbors. Astronomers watching this star dog through powerful telescopes now tell us that he is accompanied on his celestial rounds by a puppy.

And this very faint star is proving to be of considerably greater interest and importance to scientists than the splendid companion. Although only one-thirtieth of the diameter of the star, it differs very little from that body in weight. And the only explanation seems to be that it is composed of material 50,000 times as heavy as water. A match-box full of it would weigh over a ton!

Now and the physicians are really puzzled, for no element, known, or unknown, could be so dense as that. There are still some great things to be known and "fine things to be seen, before we go to Paradise, by way of Kenial Green."—The New Outlook.

### Averages Are Deceiving

British Minister Tells An Amusing Story To Prove It

"Don't have anything to do with averages," advised Sir Thomas Inskip, Minister for the Co-ordination of Defence, in a speech in London, when he told this story:

"Recently the Ministry of Health issued a blue book mentioning a mysterious malady which affected people of the 'average age of 45 years.' Doctors declared they knew nothing of such a disease. Then it was discovered that the only persons who ever had it were a baby age one year and a man aged 90."

### Quick Results

An old man fell for a fountain of youth plan. He paid a huge sum, was given six pills and instructed to take one each day for six days. Instead he took all six at once. His family had difficulty in rousing him the next morning, and when he was finally awake, he mumbled: "All right, all right! I'll get up but I won't go to school!"

A tailor claims that a man should have three business suits. That would be all right with lots of men provided that they had three businesses.

A writer declares that very few Varsity girls marry. You cannot get husbands by degrees.

## Here's that Fast "Phillips" Way To Alkalize Stomach Quickly

On all sides, people are learning that the way to gain almost incredibly quick relief from stomach conditions arising from overacidity is to alkalize the stomach quickly with Phillips' Milk of Magnesia.

You take either two teaspoons of the liquid Phillips' after meals; or two Phillips' Milk of Magnesia Tablets. Almost instantly "acid indigestion" goes, gas from hyperacidity, "acid" headaches—from over-indulgence in food or smoking—and nausea are relieved.

Try this Phillips' way if you have any acid stomach upsets. You will be surprised at results. Get either the liquid "Phillips" or the remarkable, new Phillips' Milk of Magnesia Tablets. Only 25¢ for a big box of tablets at drug stores.

**ALSO IN TABLET FORM!**  
Each tiny tablet is the equivalent of a teaspoonful of liquid Phillips' Milk of Magnesia.

MADE IN CANADA

**PHILLIPS' MILK OF MAGNESIA**

**WORLD HAPPENINGS BRIEFLY TOLD**

The Egyptian government has formally applied for admission to the League of Nations.

Egypt has joined the rearmament nations. The cabinet decided to authorize credits of \$1,100,000 (\$5,500,000) for the purchase of war material and aeroplanes.

Professor Anton Flinger of the Vienna Polytechnic school committed suicide as expiation for attacks he had made against the theories of one of his colleagues.

Jean Baptiste Boulanger, of Edmonton, 14-year-old publisher of the French-language quarterly newspaper, "Le Petit Jour," will attend the coronation in May as one of Alberta's student representatives.

Adolf Hitler's face will start going through the mail April 20—his 48th birthday. First stamps bearing his portrait will be issued then. Present stamps bear the likeness of the late president, Paul von Hindenburg.

The name "Pateux" in honor of the famous French biologist, is to be given the French liner now being built to replace the ill-fated "Atlantique." The "Atlantique" burned in the English channel in 1933.

Stranded on an ice cake in the Detroit river at Amherstburg, Ont., Donald Plant, 10, was saved from death when his screams attracted Evelyn Jones. Jones put out in a rowboat and rescued the lad.

The election of David A. Ross as president and chairman of the board of Amtorg, the Soviet trading agency in the United States, was announced. Britain proposes to spend \$2,851,000 (\$29,255,000) on air raid precautions in 1937.

### Metal For Munitions

Quantities Shipped From Windsor Junk Yard To Europe

A three and a half ton lathe, suitable for munition making, started recently on a long journey from a Windsor junk yard to the Rotterdam plant of a German manufacturing firm.

Milton Burnstone, one of the junk company proprietors, said three such machines had already been shipped to England and Germany from there to supply the growing demand for this type of shell-making equipment. In the last two and one half years, he said, scrap brass, copper and aluminum, approximately 200 tons, had been shipped to England and Germany from the Windsor yard.

Only 600,000 people are now living in South Australia's 380,000 square miles.

Industrial production in Austria is climbing toward record levels.

Gorillas often reach a height of six feet and have a reach of eight feet.

The Philippines will establish 352 new postal savings offices.

### Under Claims List

Lord Great Chamberlain Entitled To Pre-Coronation Garment

King George VI. has an intimate problem before him—to decide whether the Earl of Ancestor can have the nightgown in which the monarch sleeps the night before his coronation.

Tradition stipulates that the earl—joint hereditary lord great chamberlain—may become owner of not only the nightgown, but the bed, furniture and everything else in the room in which the King sleeps on the eve of his formally being crowned ruler of the United Kingdom.

King George also must decide whether the earl may awaken him on coronation day morning, May 12, and help him slip on the royal under-shirt, and other apparel.

The decision was left up to the King by the court of claims of the privy council, meeting at No. 10 Downing street, when the Earl of Ancestor presented a long list of claims for services at the coronation.

The Earl of Ancestor took office as the lord great chamberlain recently, by right of being the joint hereditary holder of the title. His wife, incidentally, is the former Eloise Breeze of New York. The earl's claims included:

That on coronation day, he take the King's wearing apparel to his bedroom and help dress him. That he carry the robe, crown, sword, scabbard and gold which the King shall offer at the high altar, and to carry the gloves and linen the King is to use.

That he attire the King in his royal robe, gird on the sword of state, and fix golden spurs.

### Plan Did Not Work

Unusually Tall Man Objected To Having His Skeleton Mounted

One of the oddest episodes in all medical history was the effort of an eight feet four inches Irishman named Charles Byrne to escape the dissecting knife of John Hunter, great 18th Century anatomist. Hunter wanted the giant's bones for his medical museum. Byrne opposed the idea, and, anticipating an early death as all giants do, planned cunningly to outwit the scientist.

The magazine Time records that when he drank himself to death in London in 1783, aged 22, a London newspaper reported that "the whole tribe of surgeons put in a claim for the poor departed Irishman, and surrounded his house, just as harp-owners would an enormous whale." But Byrne had arranged with friends to cart his body to the Irish Sea, to weight it and sink it in deep water. Hunter, a Scotoman, learned of this, pursued the undertakers, and cannily bought the body from them for £500. Now Charles Byrne's mounted skeleton stands in London's Royal College of Surgeons, next to the skeleton of a dwarf, once named Caroline Crachami, who does not reach up to his kneecap.

### White And Yolk Separate

In Siamese Egg Laid By Buff Orpington Hen

The problem of people who prefer either the white or the yolk of an egg but not both would be solved if Carl Van Arsade, of 615 Wayne street, could find a method of producing in quantity the Siamese egg he was exhibiting in Jackson, Mich.

The Siamese egg, laid by a Buff Orpington hen, consists of two full-sized soft-shelled eggs joined together by a stem at the end of each. One contains the yolk and the other the white.

A great financier is one who feeds, clothes, educates and decently raises a large family on a small income.

Argentina has 24,532 miles of railways.

### MY JOB AS MY FATHER'S SECRETARY

By Manly F. Miner, Son Of Jack Miner, Canadian Naturalist

Father (Jack Miner) working hard ten hours a day, six days a week, burning kilns of brick and tile two nights a week away back in 1904, when he started his bird sanctuary, had no idea that in 25 years such a hobby was going to be an example to the world for bird protection. And he certainly had no idea such work would bring him as high as three or four hundred letters in a day. Yes, and even on his birthday, 25 years ago, he had no idea he would receive well over five hundred cards, letters and messages of "good will," to say nothing about his Christmas and New Year cards he gets from all over the world. From

## HATED TO GET UP MORNINGS

Now Wakes up Full of Pep; Got Rid of Tired, Headachy, Half-sick Feeling.

Health benefits of modern living. Get rid of tired, sluggish, bad-nights, headachy mornings. Wake up happy and full of energy. It's easy, you'll think it miraculous. Follow the example of thousands who have regained full health and energy. The secret is in the prescription of a famous Canadian doctor, Fruit-a-tive, containing extracts of fruits and herbs and to bring normal, healthy lives to all, stimulating the flow of life, helping for other vital organs. . . . clear the blood, purify the system, and restore vitality. Fruit-a-tive's unique tonic effects bring new energy, new health. So try Fruit-a-tive today. For sale everywhere. Cost is low. 25¢. See for your own protection. Fruit-a-tive. Insist on "Fruit-a-tive".

### Atlantic Air Service

Britain To Lead The Way To Regular Atlantic Schedules

An Atlantic air mail service, though not yet officially announced to permit announcement of inauguration date, seems gradually to be forging clear of fogs and blueprints.

The Imperial Airways giant flying-boat, Calcutan, recently flew non-stop from Southampton to Alexandria, 2,300 miles, in 13 hours 35 minutes. She had a crew of five, half a ton of freight and averaged 170 miles an hour.

She had a crew of five, half a ton of freight and averaged 170 miles an hour.

## SUNDAY SCHOOL LESSON

JOHN'S PICTURE OF THE TRIAL AND CRUCIFIXION

Golden Text: Hereby know we love, because he laid down his life for us. I John 3:16.

Lesson: John 18:1—19:42.

Devotional reading: Isaiah 53:1-6.

Explanations And Comments

Pilate Yields to the Mob, after Chief Priests with consummate hypocrisy. Bitterly as they hated Caesar, as Pilate and everyone knew, they were willing to abide that hatred for the moment to compass the death of Jesus.

The face of Pilate was ended. Pilate delivered Jesus unto them to be crucified.

The face of Jesus, 19:28-30. Read Mt. 27:45; Mk. 15:33, 34. John records Jesus' cry, "I thirst," and at the same time, "that the scripture might be accomplished." This does not mean that Jesus uttered the cry of no more to suffer, but that, as John looked back upon the scene in later years he saw, as he wrote, that it did fulfil scripture.

Near at hand was a vessel full of vinegar, the usual drink of Roman soldiers. A sponge was fastened to the end of a branch of hyssop, filled with the vinegar, and held up to his lips. When Jesus had received the vinegar, he cried, "It is finished," and he bowed his head, and gave up his spirit.

The Descent from the Cross and the Entombment, 19:31-42. Not wishing to have the bodies of Jesus and the two maddafackers who were crucified with him hang upon the cross over the Sabbath, the Jews asked Pilate to have their legs broken and their bodies taken away. This was done to the two thieves, but finding Jesus already dead, the soldiers did this not to him, but one of them pierced his side with a spear, and from the wound flowed blood and water. Joseph of Arimathea obtained permission from Pilate to take away the body of Jesus, and with the help of Nicodemus, who brought a mixture of myrrh and aloes, he bound the body in linen cloths with the spices, and laid it in a new tomb in the garden near where Jesus was crucified.

### SELECTED RECIPES

#### OATMEAL COOKIES

Temperature: 325 degrees F. Time: 12 to 15 minutes.  
1 cup shortening; 1 cup brown sugar; 1 cup milk; 2 cups Oatmeal; 1 cup flour; 1 cup Royal House hold flour; 3 teaspoons baking powder; 1 teaspoon salt.  
Cream the shortening; add sugar, milk and Minute Oats. Add flour, which has been sifted with the baking powder and salt. Chill thoroughly, as this dough is very soft. Take out small quantity of dough and roll into a small ball between the palms of the hands. Place these balls on a greased cookie sheet about 2" apart; with a fork, press flat, first one way and then the other. Make as thin as possible. On top of each cookie press in a small piece of red or green cherry. Bake in a slow oven 12 to 15 minutes.

These cookies may be put together with the following date mixtures: 1/2 lb. dates; 1 cup sugar; 1 cup water; 1 teaspoon lemon juice. Chop dates; add sugar, water and lemon juice. Cook until mixture is thick.

Recipe by Mildred Mac MacKenzie Copyright.

#### BUTTERSCOTCH PUDDING

3 tablespoons Benson's Corn Starch  
1/2 cup cold milk  
2 1/2 cups scalded milk  
1 tablespoon butter  
1 cup brown sugar  
1/2 cup "Crown Brand" Corn Syrup  
1 teaspoon vanilla.  
Method: Mix Benson's Corn Starch and salt to a paste with cold milk; gradually add to scalded milk, stir until smooth and thick. Melt the butter; gradually add brown sugar, Benson's Corn Syrup. Stir until brown and bubbly but not burnt. Add to hot corn starch mixture; stir well; cover and cook for 20 minutes. Remove from heat; add vanilla. Chill; serve with plain or whipped cream.

### Woman Manages Farm

Wife Of Finland's New President Will Continue Work

Kyost Kallo was elected President of Finland, his wife was moved into the presidential palace with him.

She is too busy running the Kallo farm, which she has managed for many years while her husband engaged in affairs of State. Under present plans, she will remain there.

More than half the world's population is illiterate, says a British authority.

The Editor is himself again, he's growing a moustache.

### SALT IS A GREAT NECESSITY

The fact that salt is as necessary to human well being as, for instance, water, is demonstrated in a story of the North West Territories which appears in the current issue of the magazine of Canadian Industries Limited, the Oval. A party of trappers on the Mackenzie River lost a quantity of their provisions including their supply of salt when a canoe capsized. For five days they had been without salt and were beginning to show signs of cramps and fatigue due to deficiency. Rounding a bend in a river they came upon a deserted cabin in which they found, to their great relief, half a cup of salt.

### Behind the Headlines OTTAWA

By Dean Wilson

When the Prime Minister of Canada recently paid an informal visit to the President of the United States official information disclosed that it was nothing unusual in character or importance, but merely a meeting of the chief executives of the two neighbouring countries. However, the official news that has resulted from this conference did not satisfy experienced correspondents of both Ottawa and Washington who believe that Premier King and President Roosevelt discussed something of far greater importance than all official reports would indicate right now.

One thing is certain, and that is that conference was a sudden call sent forth by the President of the United States, and experienced servers are endeavouring to connect this visit of Premier King with the one paid by an important member of the British Cabinet, who arrived some weeks ago in Washington, spent several hours in secret conversation with the President, and departed for London without offering the slightest hint as to the exact purposes of this hurried call on the chief executive of the United States.

Some remarkable rumours are going the rounds of official Ottawa, but it is absolutely impossible to obtain direct information, although every sign points to some momentous decisions being considered by the Government, and no experienced correspondent in Ottawa would be shocked if he was called upon any day to prepare a history-making news copy.

Out of this intricate and complicated maze of political manoeuvres and actions by the Governments of Canada, United States and Great

### K. L. Lee to Speak at Masonic Hall

Crossfield Social Credit Group will hold a meeting in the Masonic Hall on Thursday, March 25. The speaker will be Mr. K. L. Lee, chairman of the Alberta Consumers Markets Co-operation. This is an important meeting and all members are requested to be present. The public is cordially invited. The meeting will be called promptly at 8:30 p.m.

Many of the school children have asked Mr. Christmas regarding literature on fish. We are asked to state that his wholesale home at Vancouver has exhausted its supply of this particular material.

Students desirous of obtaining information on this subject, can obtain by purchase a copy of "Canadian Fisherman", sold at the local Booksellers in town.

Britain, it appears a strong possibility of a European war upon the subject of an interpreter of mutual interest in the United States and Great Britain, which in itself would be nothing new in Canadian history, although at times she has been a source of bitter contention between these two great nations.

The official statements indicate that Premier King discussed with the head of the United States Government such matters as the possible effects of a European war upon the trade relations between Canada, Great Britain, and the United States in the face of a certain American neutrality law; the Saint Lawrence waterway treaty, which has been pending in the United States Senate since 1933; the relations of the Canadian Government to the pact that were signed by all the American republics at the recent conference at Buenos Aires; and the actual trade relations between the Dominion and the United States.

However, the news that has actually come forth from this meeting between the two titular heads of the two countries does not seem to have given much satisfaction to the experienced observers of the two capitals, who are definitely under the conviction that the real issues of this conference in a well guarded secret, because the news that has been permitted to get into the press would not have warranted the President of the United States to sign a statement to the Canadian Prime Minister during the height of an important budget debate in the House of Commons.

In any case, one point is sure, and that is that Canada's role in future political manoeuvres of the British Government in any matter involving the whole British Empire will be far greater than ever before in the history of the Dominion, and that the present gathering war clouds in Europe bring forth a gigantic conflict between nations, or just evaporates into the thin air, the Canadian Government will henceforth be an important actor in the international political drama.

When the Dominion conference of Mayors and the Union of Canadian Municipalities complete their joint meeting in Ottawa this week, it will mark the end of the greatest gathering of municipality heads in the history of Canada. It is the third conference of the chief magistrates of the various communities throughout Canada since this organization was founded by the former Mayor Camille Houde of Montreal, and the resolutions of these representatives have brought far-reaching developments in the realm of public service, finance and taxation with the end that the efficiency and power of the local governments have improved to a remarkable extent in a great many cases.

But there is a new significance to the whole gathering this year, and it is that the municipalities throughout Canada are anxious to meet there once and to work closely with the important new Royal Commission which the Dominion Government plans to empower for the purpose of investigating the whole financial structure and system of taxation in the Dominion and to study the division of the financial powers and duties or responsibility as between the Dominion and the Provinces.

Consequently, Mayor Stanley Lewis of Ottawa, who is chairman of the Dominion Conference of Mayors, has explained that it is absolutely necessary that the new representatives include the problems of the municipalities throughout Canada in the investigation work of the new Commission, if a satisfactory and conclusive solution is to be found for the many serious problems that face the country right now in the forms of finance and relief.
